

SAFETY INSTRUCTIONS AND INSTRUCTIONS FOR USE

Congratulations on purchasing your Baby EcoEgg® by Cooconiii!

The product has been developed in close cooperation with midwives and paediatricians. Its ergonomic form supports your child's back naturally. Baby EcoEgg® can be used as a beanbag for newborns, babies, children and adults. The following pages provide more information on the various uses of Baby EcoEgg®.

**ATTENTION! Please read the instructions carefully before use.
KEEP THE INSTRUCTIONS TO READ LATER!**

Using the baby support cushion for children up to max 9kg and 70cm body length

The support cushion can be easily attached to the Baby EcoEgg®. It is the same shape as the seat of the beanbag and should be placed exactly on top of it. The four straps on the support cushion should be pulled through the four attachment loops on the beanbag and closed underneath with the Velcro fastener.

- ***Make sure that all four straps have been pulled through the loops and fixed with Velcro!***

You can change the shape of the spelt beanbag for different positions.

A flat beanbag is ideal when your baby is sleeping, while inclining it allows your child to see what is going on around him/her. Position your child's head on the higher, tapering end of the beanbag. Place your child in the harness and close the belt using the button.

You can choose between two basic sizes.

For premature and newborn babies: Draw the belt through the inner slit. *For larger babies:*

Use the outer slit. Regulate the length individually using the buttonholes.

- ***Make sure that the belt is not too tight or too loose!***
- ***Never place your baby on its stomach on the baby support cushion! Danger of suffocation!***
- ***Stop using the baby support cushion when your child starts to sit up and turn over by him/herself, or if he/she has grown too big or heavy!***
- ***Use on the floor only! It is dangerous to place the beanbag on an elevated surface such as a table!***
- ***Only use for sitting on when the child can do this alone!***
- ***Never carry the beanbag with the child lying on it!***
- ***Never leave your child unattended***

Inner bag filled with spelt chaff

The inner bag is made of 100% cotton (certified organic) and is filled with organic spelt chaff (certified organic).

This comprises the husks of organic spelt grains that have been cleaned, sterilised and thermally treated in a special procedure.

The inner bag is designed so that the filling material can only be inserted, replaced or emptied through the zipper on the side of the bag, making it difficult for small children to reach.

- **Protect against moisture!**
- **Do not expose to intensive sunlight. The colours may fade!**
- **Not suitable for consumption! Danger of suffocation!**
- **Keep away from fire!**
- **Can cause an allergic reaction!**
- **Improper use can cause health impairments!**

Washing instructions:

Baby support cushion: To wash the support cushion, undo the Velcro straps on the side. Pull the belt out through the slits. Wash the support cushion and the belt separately at 40 C° using a mild ecological detergent.

Tumble dry briefly to ensure that the pile of the fur fabric stays soft.

ATTENTION: The fabric of the cushion is 100% Cotton and shrinks up to 10% after the first washing and tumbling. That's why it is delivered in a bigger size. The appearance of the fabric surface is changing too. This effect is regular and desired.

before/ after

Inner bag: Remove the spelt chaff filling before washing. Washable at up to 60°C.

Outer bag: Open the zipper on the bottom of the bag and remove the inner bag. Close the zipper again. Wash the outer bag separately inside out at 40°C using a mild ecological detergent.

Use a low spin cycle! Steam iron inside out at a medium temperature.

As we only use natural colours, these may fade after washing.

Technical specifications:

Material:

Outer bag: 100 % organic cotton,

Inner bag: 100 % certified organic cotton,

Filling: certified organic spelt chaff
